## SERVICES:

In terms of services, we categorized our services into 4 major parts: product development, lab services, waste management and other customer services.

As our relationship growing, some of customers have sometimes made requested on developing products that are well-suited to their applications and costs. As trying to serve our diverse portfolio of customers, we have also learned on our product knowledge in different industries that makes us strong in understanding what customers need and in solving problem with right solutions. Therefore, product development is becoming one of our important parts of our services on which we focus.

Lab service center provides routine lab tests on our product quality before going out to customers. Furthermore, we provide free lab tests to our customers and lab services to outsiders at low cost. Our lab is fully equipped and supervised by reliable lab chemist and lab staff.

Finally, we are concerned of environmental problem and realized of upcoming strict regulations our customers are facing. Therefore, we have made secured connection with a licensed waste management company to assist our customers on chemical waste elimination.
